Attn Examiner Stephen N Meyers
Patent Technology Center 3600

Mr. Meyers,

My intent has always been to continue processing this patent and it should never have been abandoned in the first place. If any of my prior correspondences were delivered unsigned it was an oversight.

Enclosed you will find SIGNED copies of the prior correspondences, the first was dated 02/26/04. The first letter has still not been responded to by your office because they lost this letter (delivered by March 1 2004). Proof of delivery was provided to Mr. Swaitek. This is further explained in the other letters dated September 2004, in which one of them was the unsigned request to continue to have this patent's abandoned status lifted. It should be restated that the abandoned status only occurred as a result of your office's misplacement of my 02/26/04 correspondence. The September 2004 letters were merely formality in getting the abandoned fee waived and to have my patent put back on track.

Thank you for your attention to this matter.

Sincerely,

Vincent Riemma

Attn Examiner Robert P Swiatek
Art Unit: 3643

Mr. Swiatek,

This is a response to your attached letter dated February 2, 2004. In your letter you wished to have the invention clarified.

It is my intent to have the Twin Tank Water Stabilization System with plumbing and fill capabilities patented. The housing cabinet for the invention used in the original submission, as stated in your letter, is simply for examination purposes and only serves as an example. You are correct to distinguish between the two items as a specific cabinet design is unnecessary so long as it will allow for twin tanks. The plumbing component of the invention, and parts therein that allow for the exchange of water between the tanks and interface with the building's plumbing is the idea I wish to patent.

I hope this provides you the required information. Essentially, Invention I, as indicated in your letter, would be the item I wish to patent. Invention II (housing), as indicated, can be modified and specialized, but is not a required to be of an exact specification for Invention I to work.

It is not my intent to patent Invention II at this time, and as these inventions are independent of each other, should not be necessary in order to move forward with the patent for Invention I.

Thank you for your attention to this matter.

Sincerely,

Vincent Riemma

Attn Examiner Robert P Swiatek
Art Unit: 3643

Mr. Swiatek,

This is in response to your letter dated September 8, 2004. In your letter you indicated you never received our last response sent in late February 2004. Included with this correspondence is a copy of that letter's proof of delivery and a reprint of our response to your original inquiry dated February 2, 2004. It is our intent to continue the processing of this patent as it should never have been moved to abandoned status.

Thank you for your attention to this matter.

Sincerely,

Vincent Riemma

Alexandria, VA 22313-1450

Attn Commissioner for Patent
Art Unit: 3643

Commissioner,

This is a petition to revive a Patent Application that went into an abandoned status. Please find copies of the correspondence between myself and Robert Swiatek (art unit 3643) dating back to February 2004.

It is my intent to continue this patent process. I have delivery proof for the last letter that Mr. Swiatek never received. It is because Mr Swiatek never received this last correspondence that this patent has ended up in an abandoned status. A copy of that letter originally sent in February has been included in this correspondence.

There should be no fee for this period.

Thank you for your attention to this matter.

Sincerely,

Vincent Riemma
